

BIOGRAPHY

Leslie K. McNew

WORK HISTORY

**AB Freeman School of Business, Tulane University. Clinical Finance Professor and Director of Trading Centre
New Orleans, Louisiana**

08/02-8/03

Hired to develop the AB Freeman Trading Centre, aid in the development of the Energy Institute, and teach financial courses directly related to financial markets and energy risk management. Responsibilities in five related areas as follows:

Trading Center

Developed, produced and implemented strategic document to build Trading Centre software as applied to both academic and experiential learning. Tested software, negotiated and purchased phase I software including FEA models, Crystal Ball, KIODEX (energy portfolio management software) and IFX Markets currency speculation platform. Developed and implemented academic plan for Trading Centre including introduction of five new courses : Financial modeling using Excel, Crystal Ball risk analysis, FEA modeling Level I and II, Energy risk management in conjunction with the KIODEX system and Fundamental and Speculative Trading in foreign exchange. Worked with Kiodes to use Trading Centre as energy training site for South.

Academics

Designed and implemented new course in fundamental and technical speculation with superior teaching scores: FINC 480 (full semester course). Updated Finc 716 (Currency and Exchange Rates) to use excel modeling. Update FINC 741 (Energy risk management) with superior teaching scores (have taught this I past as executive professor).

Energy Institute

Developed academic strategic plan for Trading Centre as it applies to Energy Institute. On directive from Dean, produced “implications of Introducing RTO Structures and LMP Methodology at Entergy: Strategic Business Implications Project Plan (Including Trading Implications)” for Entergy Corporation. Raised over \$80,000 in art for new Energy Institute in donations and ‘loans’.

McNew Pelican Fund

Designed and developed new experiential learning lab, McNew Pelican Fund (www.mcnewpelicanfund.com) to introduce students to speculative foreign exchange trading under strict risk management guidelines. Developed partnership documents in conjunction with Jones Walker, New Orleans, developed and implemented risk management and operational risk management guidelines, piloted program with six students (five traders and one risk manager) Summer, 2003, and raised initial capital of \$103,000. This lab will be used in academic year in conjunction with FINC 780 (Fundamental and Technical Trading) and Summer 2004 internship program in new Trading Centre. Profits of Fund 50% donated to AB Freeman School of Business Trading Centre.

Publications and Speaking Engagements

See attached list
